

UPS Shipping Add-on

Integrated Shipping Provider
Add-on for CyberStore for SYSPRO

Real-time Freight Calculation

With CyberStore you can provide your visitors with real-time UPS shipping options with this add-on. Integration into the UPS API service is built into the CyberStore to allow for real time actual shipping price calculations. Well-suited for small orders with US destinations and a single shipping origin, the UPS API provides for simple, accurate freight pricing.

Enhanced User Checkout

During the checkout a site visitor is presented with real-time UPS pricing for their order. For each UPS linked shipping method the cost will be shown in the shipping method selection drop down.

Simple Integration and Setup

For each method you would like to make available on the store you setup in the console, simply link it to the UPS Provider option. Instruction Code relates back to SYSPRO ERP and thus allows you to link an Instruction Code setup in SYSPRO ERP to the CyberStore and now also to the UPS API.

Flexible Shipping Options by Customer Class

Additional filtering is available on the Customer Class where you may set which Shipping Methods will be available during checkout. Furthermore, a new feature to rely on the default shipping method set on the Customer in SYSPRO may be used to dynamically include just that customer's shipping method if desired.

The screenshot shows a checkout interface with four steps: Step 1 (Shipping Address), Step 2 (Shipping Method), Step 3 (Payment Method), and Step 4 (Confirm Order). Step 2 is active. A dropdown menu for 'Select Shipping Method:' is open, displaying 'UPS - 2nd Day Air (\$128.06)' and 'UPS - Overnight (\$356.92)'. Below the dropdown, there are fields for 'Requested Ship Date:', 'Special Instructions(optional):' (with options like 'Send by Post', 'Send by Road', 'FREE Ground Shipping', 'Send by Air'), and 'Job #'. An 'Order Comments' text area is at the bottom. 'Continue' and 'Cancel' buttons are at the bottom left.

Present real-time freight pricing to customers during checkout.

The screenshot shows a 'Shipping Method' configuration window. It has a search bar with 'A' and 'Back'/'Next' buttons. Under the 'General' tab, there are fields for 'Instruction Code' (A), 'Instruction Code Description' (Send by Air), 'Calculation Type' (Provider), 'Carrier Code' (Dovetail UPS), and 'Carrier Method Name' (NextDayAir). A dropdown menu is open showing a list of shipping methods: NextDayAir, SecondDayAir, Ground, WorldwideExpress, WorldwideExpedited, Standard, and ThreeDaySelect.
